

## REMARKS

The amendment in Paragraph [0001] is a correction of a minor clerical error the need for which is obvious from the context.

The amendment in Paragraph [0005] is also a correction of a minor clerical errors, the need for which is apparent from Office records. The list of patents and applications in this Paragraph is stated to be of E Ink and MIT patents relating to electrophoretic displays. U.S. Patent No. 6,249,721 is not assigned to either E Ink or MIT and does not relate to this technology. Hence, correction is obviously required, and Office records show that the correct Patent No. 6,249,271 must be intended.

No new matter is introduced by these amendments.

Entry of this Amendment is respectfully requested on the grounds that it will not require extensive review by the Examiner, being confined to correction of minor clerical errors, but will facilitate access to correct related patents by a reader of the patent to be issued on this application.

Respectfully submitted
